

High Security Solutions

Don't let thieves design your customer experience

MECHANICALLY ROBUST CONSTRUCTION

Designed to withstand aggressive physical attacks from hand-pulling to kicks and tool strikes.

INTELLIGENT ALARMING TECHNOLOGY

Electronic sensors throughout displays trigger audible signals at any disconnection or physical breach.

FULLY SCALABLE PRODUCT PLATFORMS

Easily modify configurations to increase or decrease security to suit environment demands.

InVue's high security solutions provide powerful security that return control and safety back into the hands of the store.

Handheld Electronics

Protect valuable phones and tablets with InVue's OneKEY compatible OnePOD high security display stands. A clean, consistent design houses a range of security levels to choose from.

ONEPOD

Industry-leading steel construction stand and sensor. Options for a high security recoiler, complete lock down in a fixed position, 4-way unibody security arms, and quick release for nightly merchandise removal.

Smartwatches

Protection for smartwatches and wearables. Create engaging displays with superior protection and built-in charging. InVue's solutions for smartwatches and wearables provide an optimal customer experience, without sacrificing security.

ONEPOD WEARABLES & HSW100

OnePOD Wearable's open hoop design houses a recoiler that maintains security without obstructing the product experience. HSW100 is a heavy-duty stand with a clean, low-profile design that reduces theft access points. This powerful stand offers scalable security that won't affect the overall display.

High-Value Displays

Secure protection for a wide range of merchandise on display.

ZIPS

The versatile Zips solution can withstand 150lbs of pull force and is the most flexible option for powered and non-powered merchandise. Available with high-security sensors and brackets, as well as a choice of alarm units.

InVue solutions encourage customer engagement, while protecting from aggressive theft attempts.

Secure Storage

Fast access to merchandise allows your employees to better service customers and increase sales.

SMART LOCKS

Together with OneKEY, InVue's Smart Lock solutions ensure worry-free, self-latching protection for locked cabinet and drawer merchandise. Lock options can be fully protected to be pick resistant, and mounted on wood, glass, metal or acrylic.

Data and Analytics

Harness powerful analytics to decrease internal theft and improve profits by knowing who did what, where and when.

ACCESS MANAGER

With the power of the OneKEY, Access Manager can analyze lock interactions and used to pinpoint internal and external theft events, assist with merchandising and product placement and better understand associate productivity across retail stores and departments.

OneKEY[™]
ecosystem

High security solutions are part of the exclusive InVue OneKEY ecosystem[™], a storewide single key solution that improves customer service, increases sales and provides high theft protection.
